

Ulefone Armour 8 Pro

GORUGGED

Armor 8 Pro adopts the bi-injection molding process, which is widely used in the military industry, to make itself rugged. Solid polycarbonate, glass fiber offer high strength and hardness while soft TPU material provides effective buffer protection for the phone, no more worries about accidental drops in the outdoors. The advanced sealing technology and tight structure can effectively protect water and dust from entering into Armor 8 Pro. It fills the inevitable gaps around the physical keys with waterproof films, components which are exposed to the outside also have a high-density macro-molecule coating for waterproofness.
